### Coffee Market Report

The latest Commitment of Traders report from the New York Arabica coffee market has seen the shorter term in nature Managed Money fund sector of this market increase their net short sold position within the market by 18.18% over the week of trade leading up to Tuesday 17th. April; to register a new net short sold position of 70,771 Lots. Meanwhile the longer term in nature Index Fund sector of this market increased their net long position within the market by 4.67%, to register a net long position of 41,287 Lots on the day.

Over the same week, the Non-Commercial Speculative sector of this market increased their net short sold position within this market by 22.86%, to register a net short sold position of 70,557 Lots. This net short sold position which is the equivalent of 20,008,267 bags has most likely been since reduced, following the period of mixed by overall more positive trade that has since followed and likewise, that of the managed money fund sector of the market. The evidence of the extensive net short sold position of the speculative and fund sectors of the New York market has brought into play some degree of short covering buying for the market, but with the renewed muscle of the U.S. dollar and with emerging market currencies having lost some value for the start of the week, it brings with it the potential for increased volumes of producer price fixation hedge selling pressure for the markets. This with the prevailing bearish news of the forthcoming new and larger Brazil crop that dominates market sentiment, is likely to create something of a nearby ceiling for both markets.

The July 2018 to July 2018 contracts arbitrage between the London and New York markets broadened yesterday, to register this at 38.71 usc/Lb., while this equates to 32.54% price discount for the London Robusta coffee market. The Certified washed Arabica coffee stocks held against the New York exchange were seen to increase by 11,310 bags yesterday, to register these stocks at 1,990,502 bags. There were meanwhile a smaller in number 8,497 bags decrease to the number of bags pending grading for this exchange; to register these pending grading stocks at 52,592 bags.
