Coffee Market Report

Reports out of Brazil reveal slow internal market sales, which makes on speculate that it is resulting in likewise subdued price fixation selling activity within the coffee terminal markets on the part of the countries exporters. Meanwhile the weather conditions over the main coffee districts in Brazil are presently dry, which is assisting to accelerate the new crop harvesting activity within many conilon robusta coffee districts.

The coffee markets encountered a weakening Brazil Real yesterday, which with the perspective for increased price fixation selling from the world's leading producer, had its impact upon confidence and put renewed pressure upon the New York market.

The reports out of Vietnam indicate internal market price resistance and relatively slow sales to the mills and exporters in Ho Chi Minh City, which exporters indicate shall result in exports of mostly robusta coffees of only 2 million bags for the month of April.

This with internal market price resistance being shown for the remaining new crop stocks within Mexico and Central America, is all contributing in a lacklustre physical coffee market for the present.

The July to July contracts arbitrage between the London and New York markets broadened yesterday, to register this at 30.30 usc/lb., while this equates to 32.46% price discount for the London Robusta coffee market.

The Certified washed Arabica coffee stocks held against the New York exchange were seen to decrease by 1,577 bags yesterday; to register these stocks at 2,468,035 bags. There were meanwhile a larger in number 5,130 bags increase to the number of bags ending grading for this exchange; to register these pending grading stocks at 10,260 bags.
