Coffee Market Report

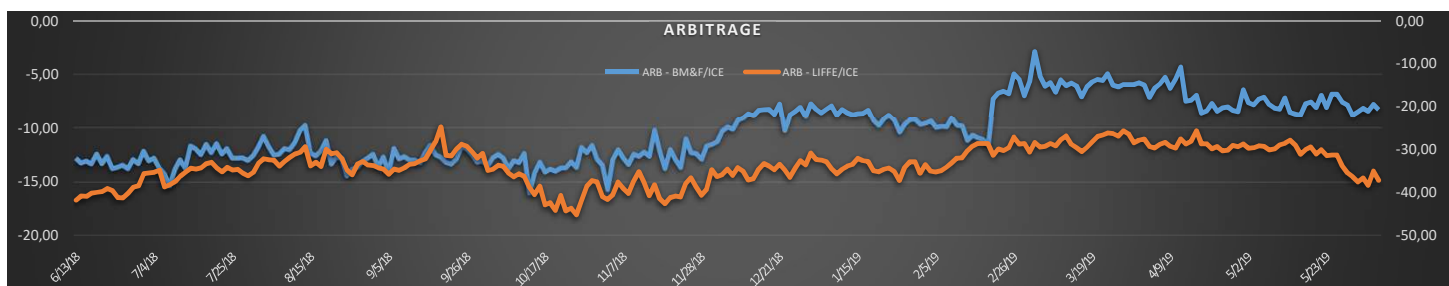

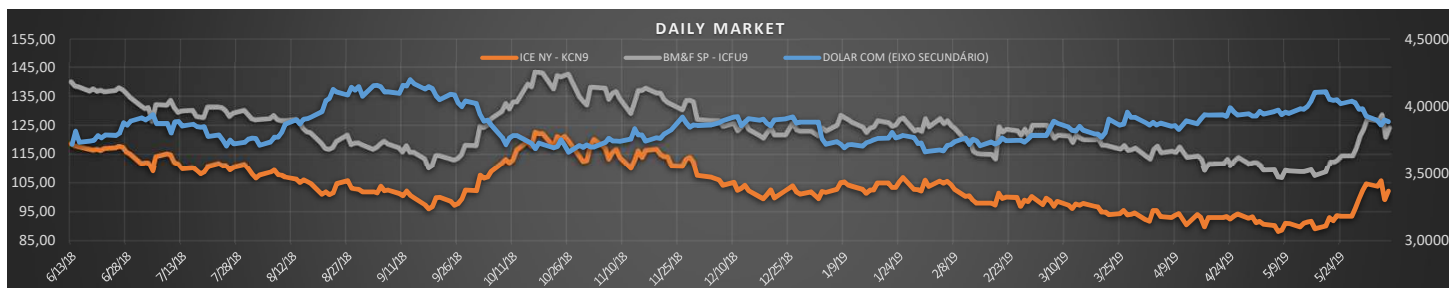

The National Coffee Growers Federation in Colombia have reported that the country's coffee production for the month of May was 73,000 bags or 6.14% lower than the same month last year, at a total of 1,15,000 bags. This has contributed to the countries cumulative production for the first eight months of the present October 2018 to September 2019 coffee year to be 234,000 bags or 2.5% lower than the same period in the previous coffee year, at a total of 9,131,000 bags.

The National Coffee Growers Federation in Colombia have also reported that the country's coffee exports for the month of May were 62,000 bags or 6.45% higher than the same month last year, at a total of 1,023,000 bags. This has contributed to the country's cumulative coffee exports for the first eight months of the present October 2018 to September 2019 coffee year to be 452,000 bags or 5.13% higher than the same period in the previous coffee year, at a total of 9,256,000 bags.

The coffee markets and along with the negative nature of the overall macro commodity index, took a late in the day tumble yesterday. The losses within the coffee markets perhaps accentuated, by the view that many had taken that they had been over bought over the past couple of positive sessions of trade.

The September to September contracts arbitrage between the London and New York markets narrowed yesterday, to register this at 36.57 usc/Lb., while this equates to 35.94% price discount for the London Robusta coffee market. The Certified washed Arabica coffee stocks held against the New York exchange were seen to decrease by 1,712 bags yesterday, to register these stocks at 2,389,015 bags. There was meanwhile a smaller in number 645 bags decrease to the number of bags pending grading for this exchange; to register these pending grading stocks at 948 bags.
