Coffee Market Report

The coffee markets set off on a positive track on the opening in both markets yesterday, buoyed by weather forecasters report of a cold front to pass across the southern Brazil coffee belt in the coming fortnight, ahead of the next full moon on 16th July, bringing along with the forecast, speculation of a chance of frost. Albeit that if any, the chance of frost damage would be extremely limited in the overall context of coffee areas and production within the coffee growing areas in Brazil, which have additionally seen coffee plantations move out of higher risk areas. One might anticipate that the prospects of forthcoming cold front forecasts ahead and into the traditionally cool winter month of July to maintain a degree of speculative market support to limit the downside potential of the markets in the near term.

The September to September contracts arbitrage between the London and New York markets widened yesterday, to register this at 41.45 usc/Lb., while this equates to 38.58% price discount for the London Robusta coffee market. The Certified washed Arabica coffee stocks held against the New York exchange were seen to increase by 405 bags yesterday; to register these stocks at 2,387,415 bags. There was an increase of 3,134 bags to the pending grading stocks for this exchange; to register these pending grading stocks at 4,049 bags yesterday.
