### Café Borbone – third quarter results

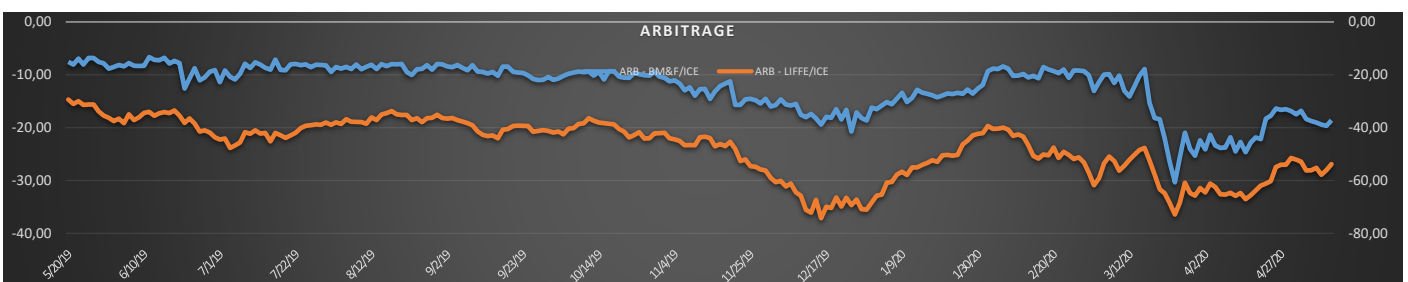

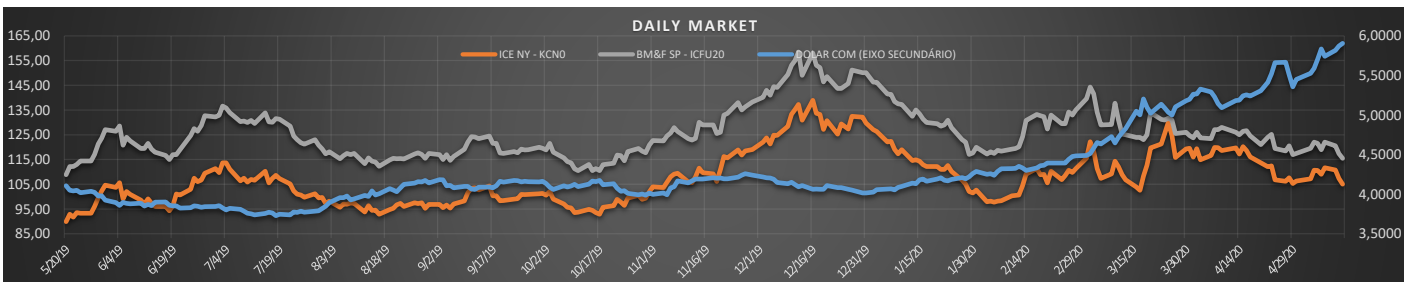

Despite the negative impact from the end of February of the Covid-19 emergency on some key channels (think of vending), Caffè Borbone closed the first quarter of 2020 with revenues of 48.9 million euro, up by 15.3% compared with the same period of 2019 driven by the decidedly positive trend of the online channel and of mass merchandising.

It should be stressed that this result was achieved despite a temporary reduction of the company's production capacity in March.

This demonstrates that the company considers the health of its employees as an absolute priority, as on a precautionary basis, it reduced the length of shifts to ensure wider spacing within its production facility. The gross operating profit stood at 15.6 million euro, with a growth rate of 26.6% compared with the same period of 2019, also thanks to careful management of operating costs.

The net financial position at March 31, 2020 was negative for 21.3 million euro, with a positive cash flow in the quarter of 10.3 million euro.
